The Kenyan AI+CAM Cohort: Ages 22-34. Highly educated (100% tertiary). Diverse professional demands ranging from e-commerce to education.

Basic Users (N=2)

Users 2, 8

Motivation: Memory capture, fun, and ease of use.

[PRIORITY: FRICTIONLESS]

Photography Enthusiasts (N=4)

Users 1, 3, 5, 10

Motivation: Aesthetic perfection, filling in missing elements, spatial manipulation.

[PRIORITY: CONTROL]

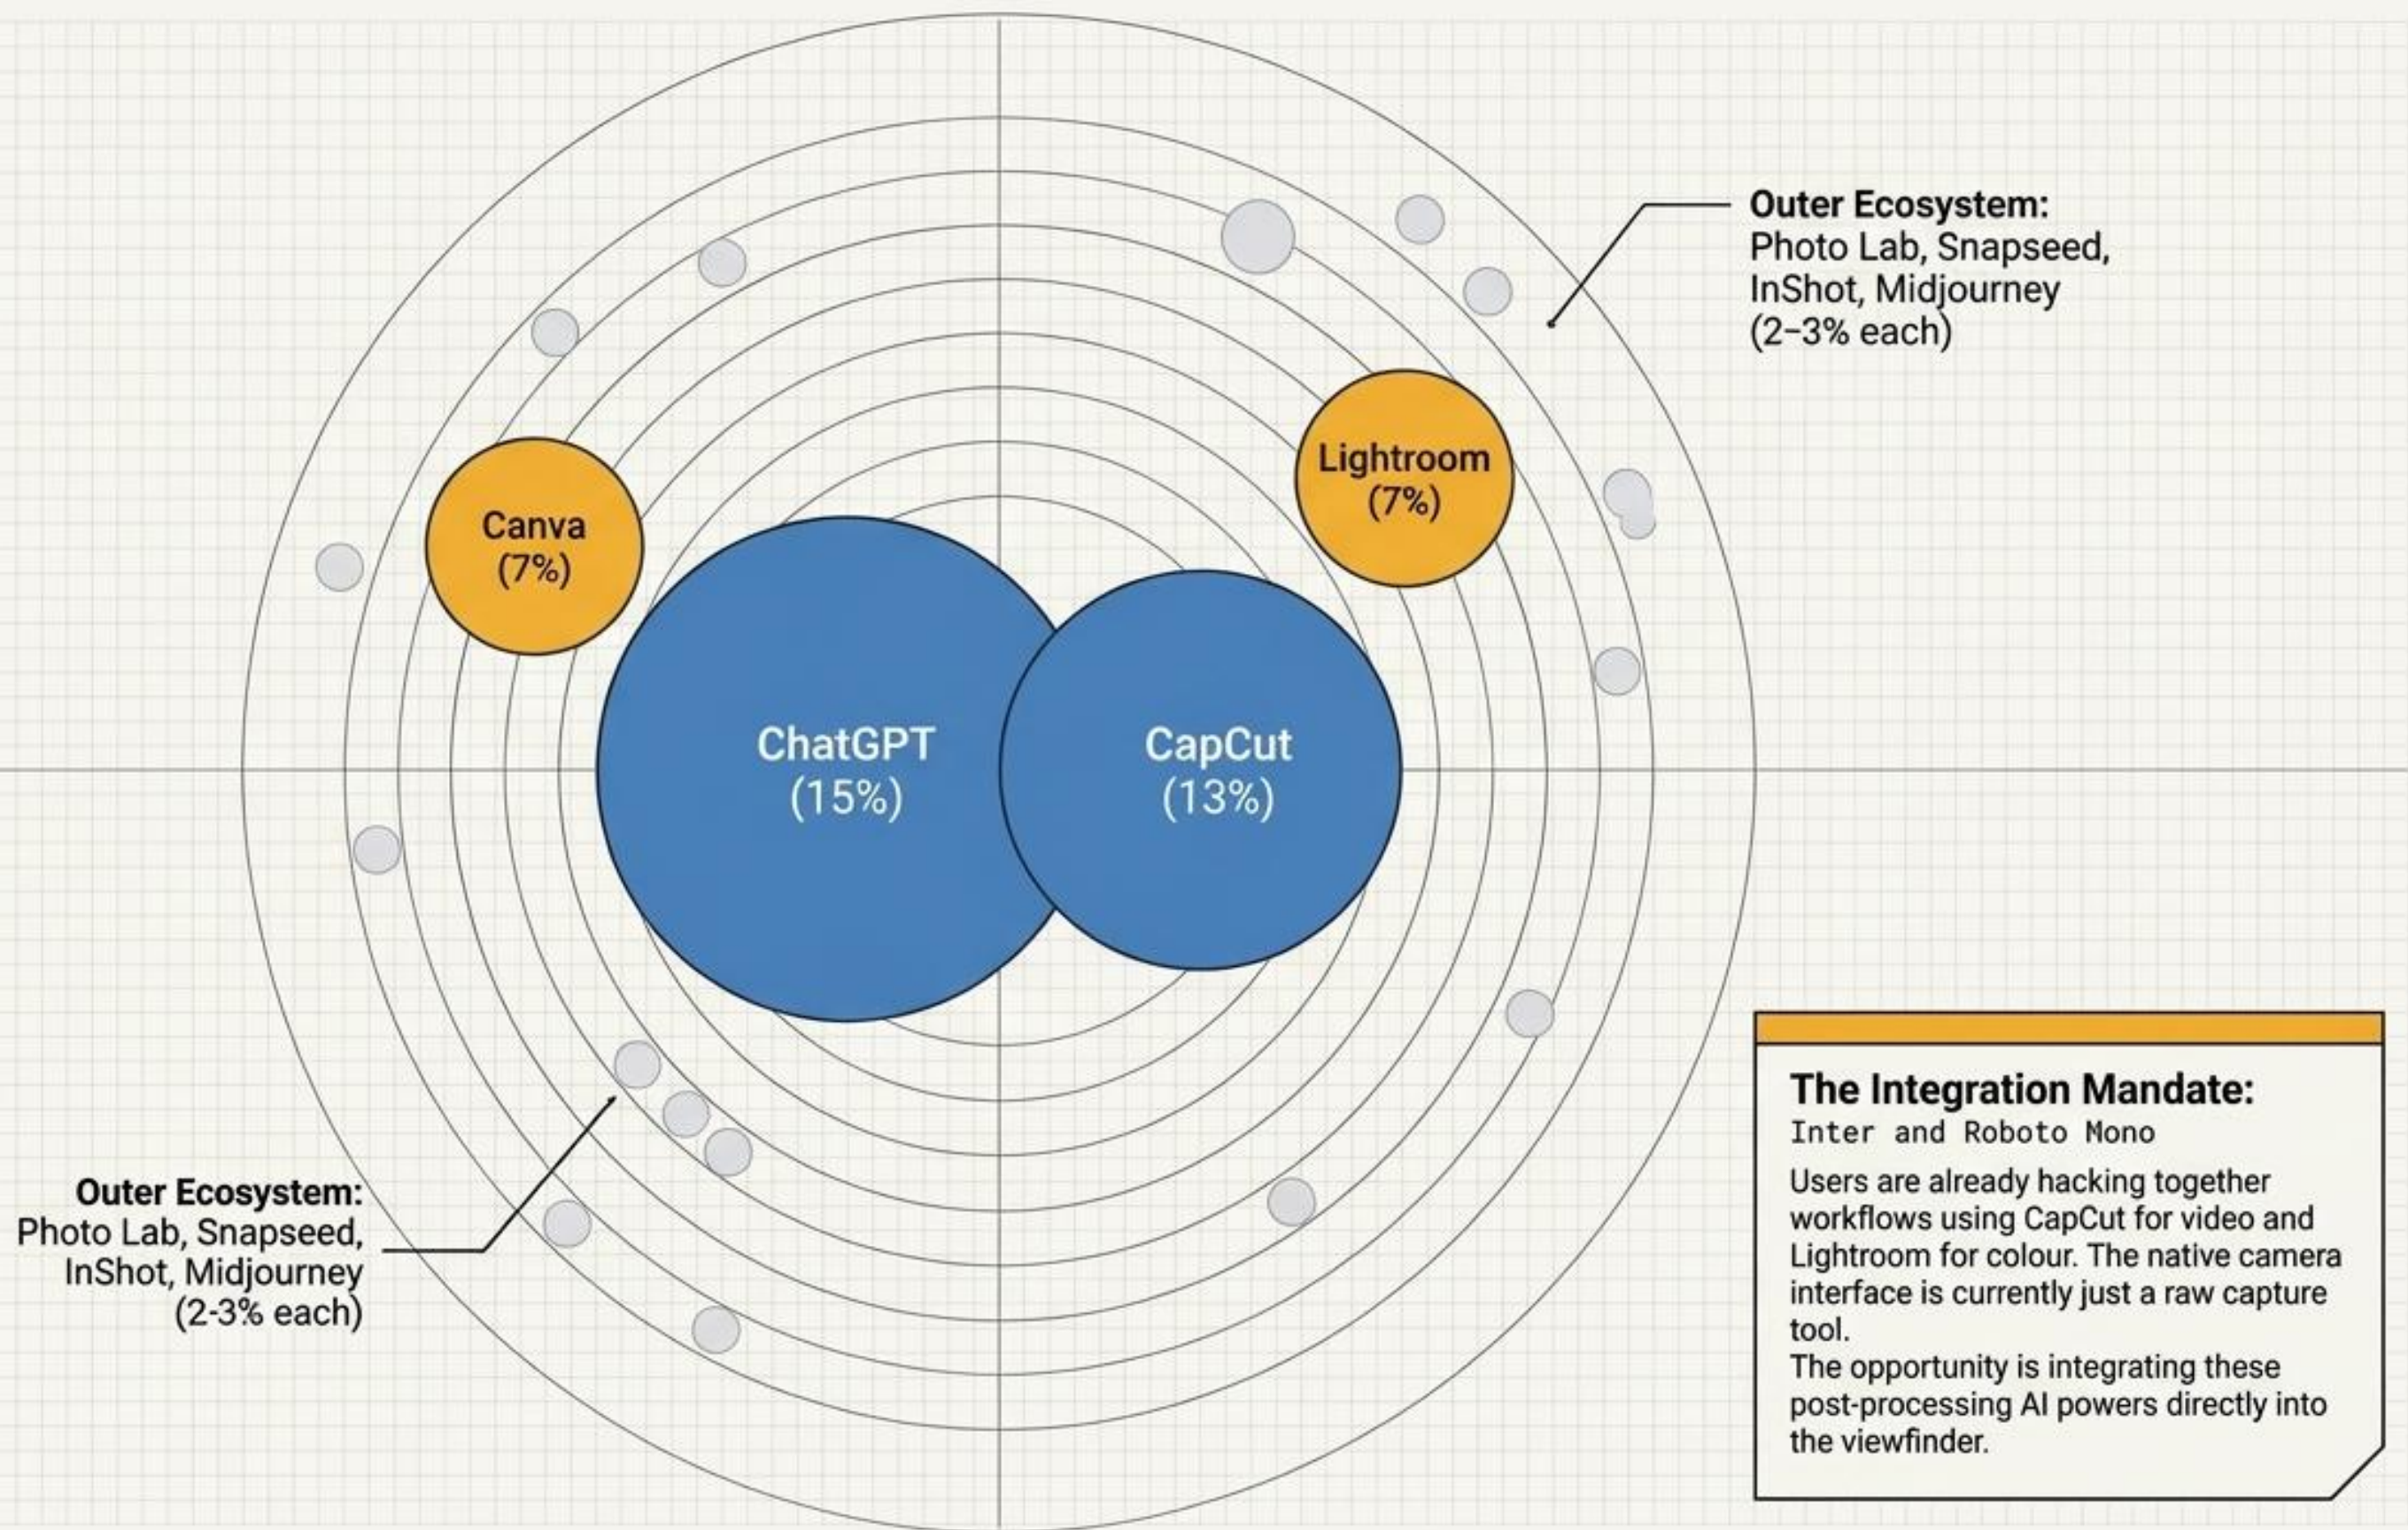

Content Creators (N=4)

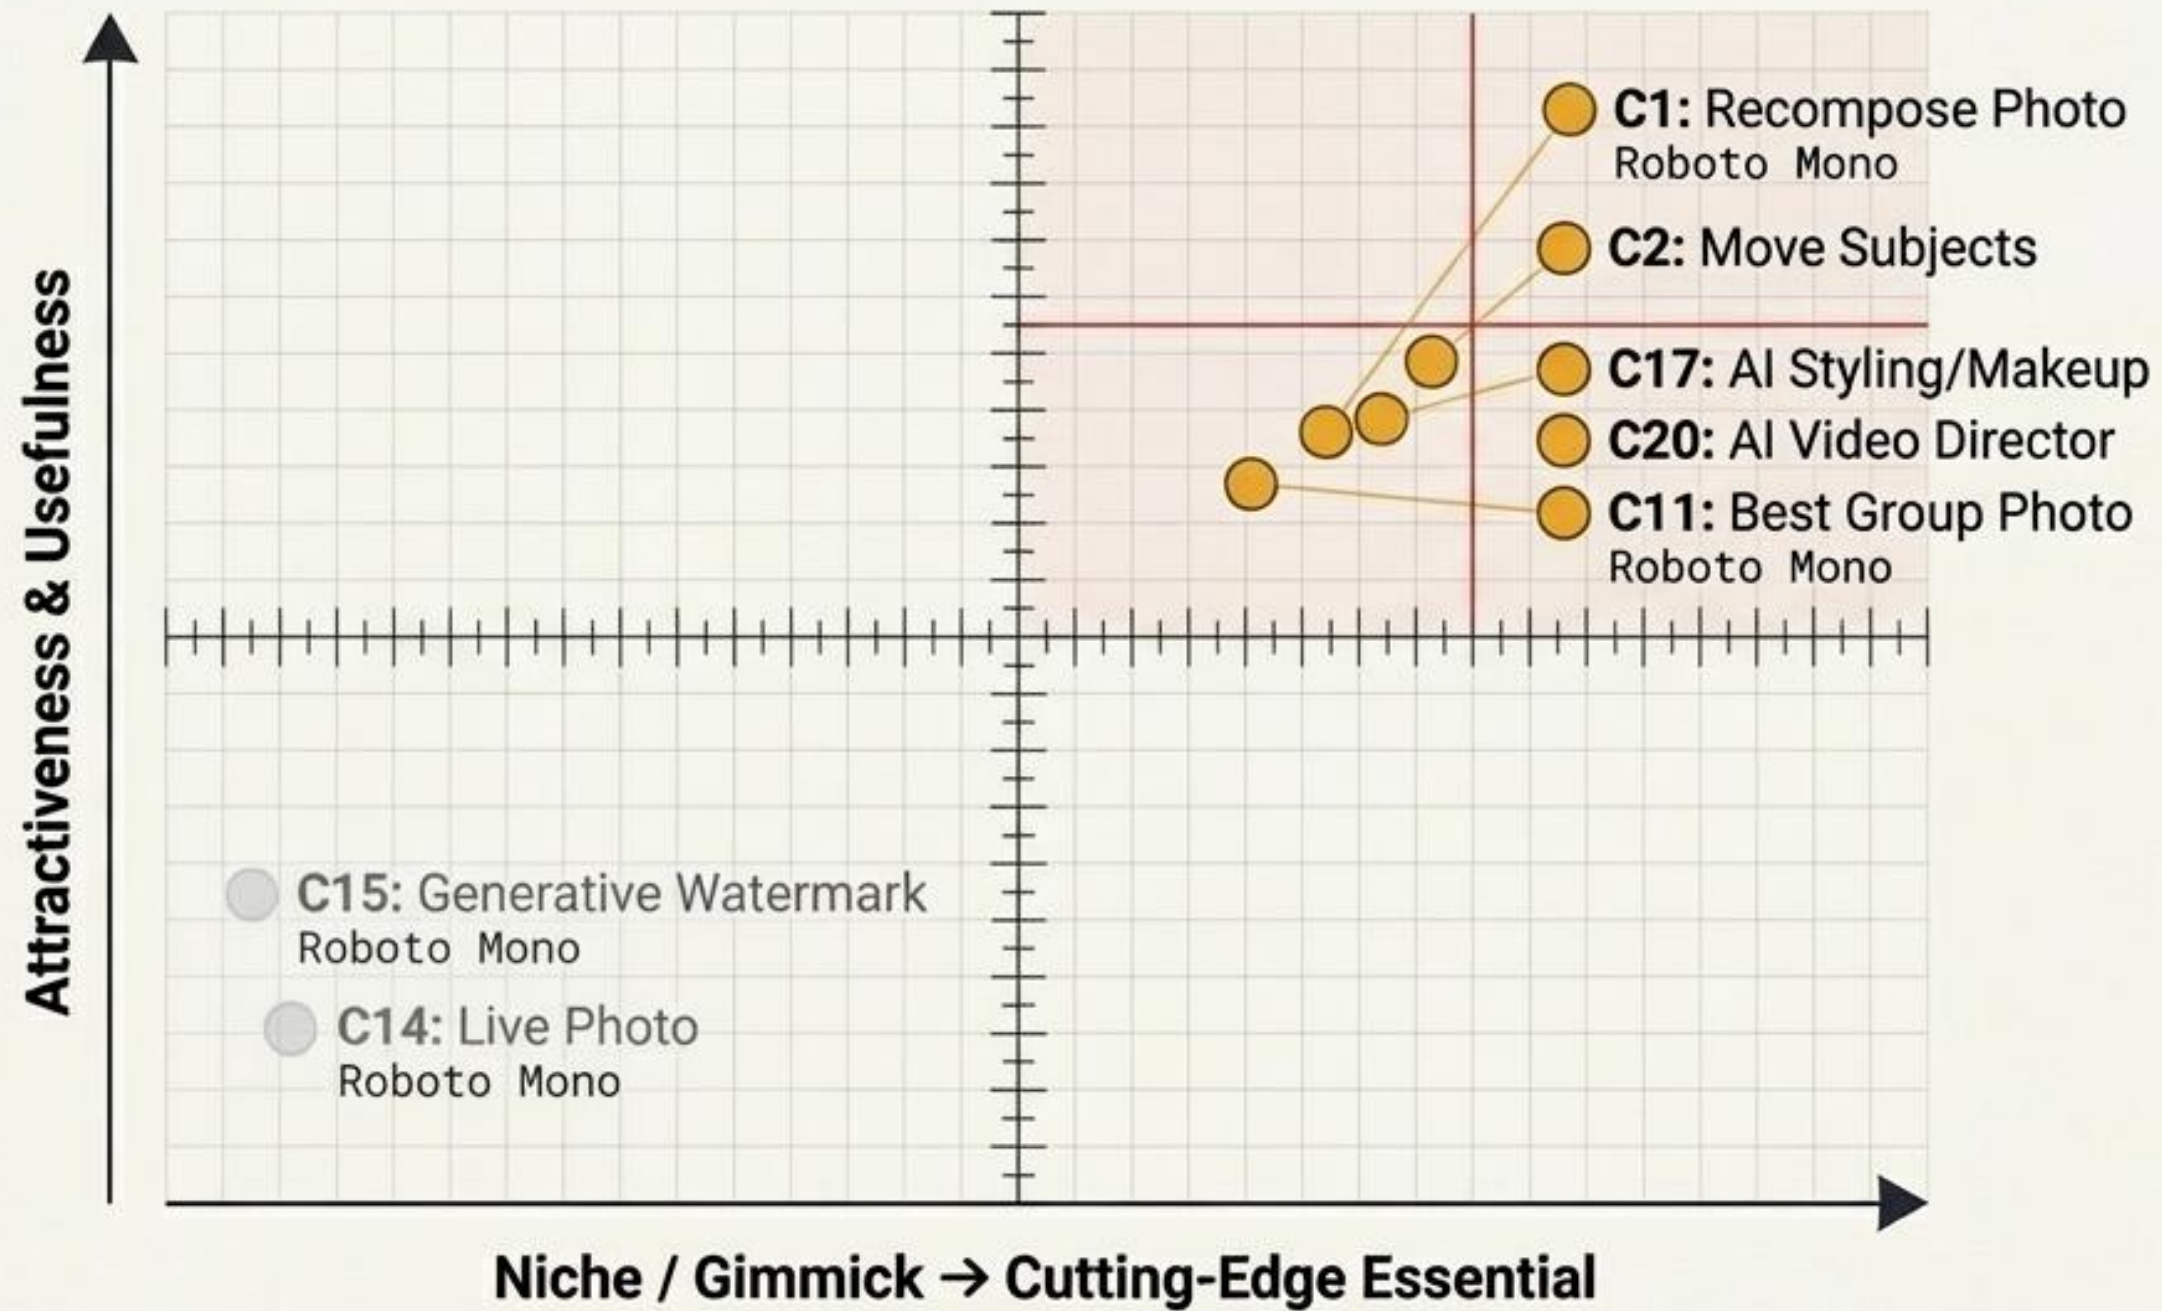

Users 4, 6, 7, 9

Motivation: Storytelling, engagement, video direction, professional outputs.

[PRIORITY: GENERATION]

Product features must map to archetypal needs. A feature built for a Creator will overwhelm a Basic User unless abstracted behind a one-tap UI.

Key Insight: Top-performing concepts bifurcate into two core desires: **Ultimate Spatial Control** (Recompose/Move) and **Aesthetic Identity** (Styling/Group Expression).

Spotlight: Spatial AI (Recompose & Move)

[ULTIMATE CREATIVE CONTROL]

Users view spatial manipulation not as 'faking' a photo, but as **rescuing** a **poorly composed reality**.

User 2: I would use it in repositioning myself between high worth individuals... or beside a beach.

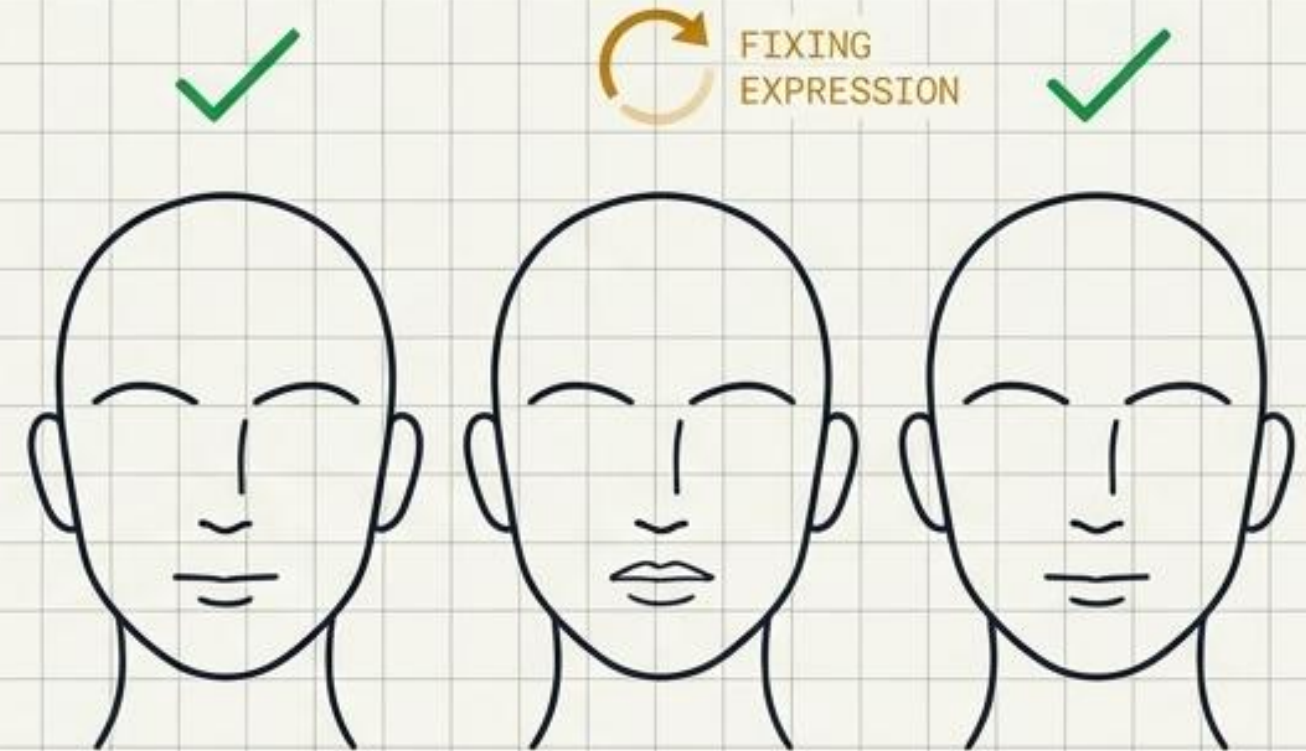

User 7: Would create perfect composition... during concerts to modify photos without losing key details.

C17: AI Styling

User 8: Will save much time... if I can do the make-up on my phone since it saves money.

C11: Best Group

User 3: Generates different expressions... allows everyone to feel as part of the photo.

[CURATED AUTHENTICITY]

Aesthetic AI serves dual purposes: digital grooming for basic users, and pre-photoshoot conceptualisation for enthusiasts.

Hi, help me generate a popular dressing video script for Instagram

Sure, I'd be happy to help you with that. Here's a popular dressing video script for Instagram:

[Opening Scene]

[Background music starts]

[Show a quick montage of the outfit pieces laid out on a bed or table]

[Voiceover]

"Hey everyone! Welcome back to my channel. Today, I'm going to show you how to put together the perfect casual-chic look for any occasion."

[Transition to Trying on Outfit Pieces]

[Show clips of trying on different outfit pieces and accessories]

[Voiceover]

"First, I'm starting with this trendy oversized sweater. It's super cozy and perfect for a relaxed yet stylish vibe."

Monica

User 6: Help me arrange my script writing ideas to be more economical and have more time saved.

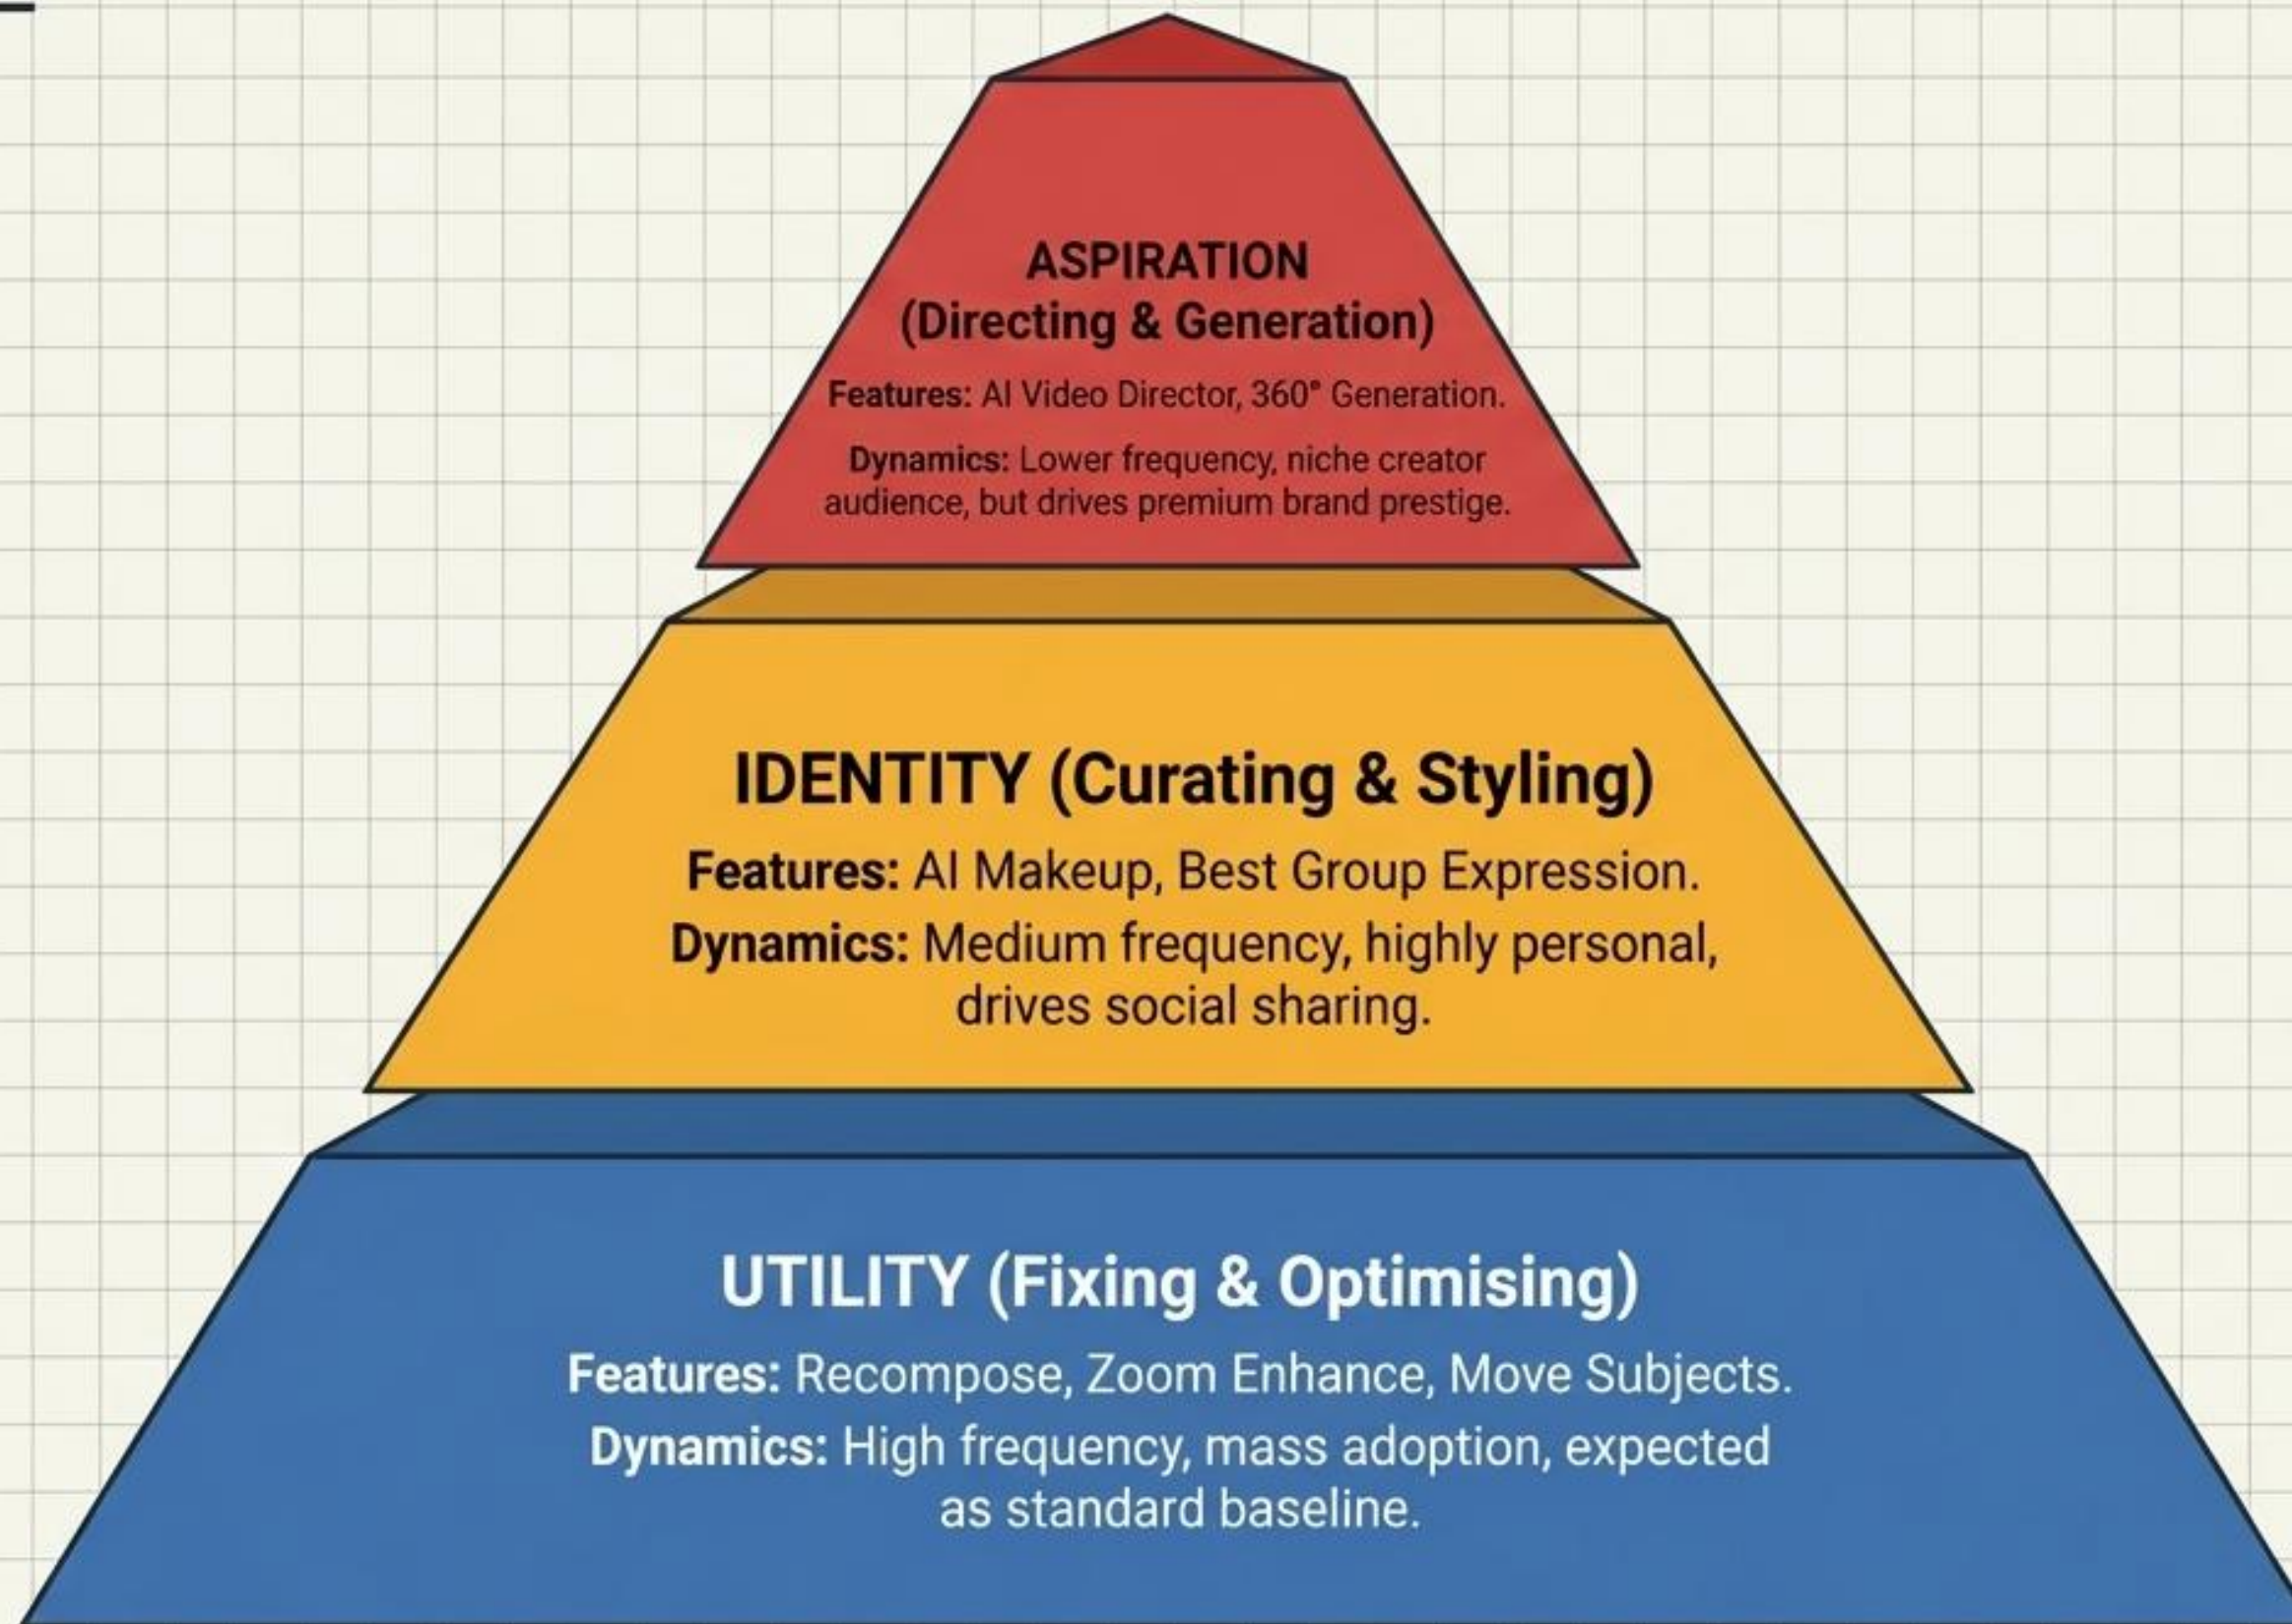

C20: AI Video Director

[THE BLANK CANVAS BRIDGE]

Video directors empower basic users to become creators by abstracting the technical friction of scriptwriting and shot-planning.

User 7: Help in videography for people who don't know how to tell the story.

A successful AI+CAM product must secure the Utility base before marketing the Aspirational peak.

	Basic Users	Photography Enthusiasts	Content Creators
Recompose	●	●	●
Move Subjects		●	●
Best Group Photo	●	●	●
AI Styling		●	●
AI Video Director			●

SYS_PROMPT: Prioritise universal hits for default camera UI;
bury creator-exclusive tools in 'Pro' menus.

01: Embed, Don't Isolate

Users are already dependent on external apps (CapCut/Canva). AI features must live natively inside the viewfinder with zero-friction UX. Do not make them open a separate AI Studio app.

02: Push the Boundaries of 'Real'

Kenyan users show surprisingly low friction towards extreme manipulation. Focus on authentic-looking results, not authentic capture. The end justifies the means.

03: Bridge the Skills Gap

The highest value of AI is educational. Tools like 'AI Video Director' shouldn't just do the work; they should teach the user how to be a better storyteller. Build for empowerment.

END OF DIAGNOSTIC. READY FOR ROADMAP INTEGRATION.
